

Enfuselle®

C+E Repair P.M.™

Step three: REPAIR

An exclusive vitamin C product formulated to be stable and clinically proven to visibly firm skin by 154% in 4 weeks.*

This patent-pending skin-activated formula contains high levels of vitamins C and E to instantly soften the skin and to reverse the visible signs of aging. With continued use, skin appears transformed as it recaptures youthful firmness and luminosity. Exclusive, non-irritating formula.

C+E Repair P.M.

1 oz. #32512
All skin types

* In half-face studies, bioinstruments were used to objectively measure the depth of fine lines and wrinkles on one side of the face where Enfuselle was being applied and compare these results to the control side where no skin care products or makeup were used. The results of the tests, due in part to rapidly changing climate conditions, were extraordinary: where no skin care or cosmetic products were used, the visible signs of aging became measurably deeper, while the skin treated with Enfuselle products steadily improved.

CHALLENGE:

Healthy young skin looks firm, reducing the appearance of wrinkles, giving skin bounce and resilient texture. Today your skin is exposed to significantly higher levels of UV radiation, which disrupts and damages the appearance of skin. Starting early in life, this damage starts to add up to create prematurely older looking skin – fine lines and wrinkles creep in, skin doesn't bounce back like it used to, becomes dull, and loses the softness and glowing appearance of youth.

Research shows that vitamins C and E boost the skin's natural ability to protect itself against the visible aging effects of time and the sun. However, the Vitamin C in other products is destroyed by oxidation as the fragile vitamin is exposed to water and air, even while still in the package. The best form of vitamin C is pure ascorbic acid, which is extremely difficult to stabilize against this kind of oxidative destruction.

C+E REPAIR P.M.:

As part of the revolutionary Enfuselle Anti-Aging Skin Care System, C+E Repair P.M. works overnight to help boost your skin's natural ability to repair its appearance:

- **Skin-activated to protect vitamin potency.** The patent-pending WATER-FREE formula of C+E Repair P.M. releases its nourishing benefits only when it comes in contact with the naturally occurring moisture in your skin.
- **Visibly firms to recapture youthful resilience.** 10% vitamin C – Vitamin C and vitamin E are partners in antioxidant protection – and the ideal ratio of C to E is 2-to-1. Enfuselle's exclusive, patent-pending delivery system provides an exceptionally high level of vitamin C to support skin's natural defenses against UV-induced collagen breakdown. Restores the firm and glowing look of youthful skin without irritation.
- **Instantly creates lasting, silky softness.** 5% vitamin E – The ideal proportion of derma-available vitamin E revitalizes skin texture for skin that feels silky soft immediately...and remains youthfully touchable even the next day.
- **Evens skin tone and diminishes blotchiness.** With continued use, your skin will appear luminously radiant and revitalized.
- **Specifically formulated for sensitive skin.**

WHO MIGHT BENEFIT FROM C+E REPAIR P.M.?

- Anyone concerned about prematurely older looking skin.
- People facing increasing environmental challenges, such as commuting by car or bus, working at a computer or under fluorescent or halogen lights, living or working with smokers, spending time in the sun, even washing their face with tap water.
- People interested in a clinically tested, anti-aging skin care program with proven results.

HOW SHOULD C+E REPAIR P.M. BE USED?

In the evening, use after cleansing, toning, and applying Enfuselle Eye Treatment. Dot C+E Repair P.M. onto face and neck. Massage gently into skin until completely absorbed. Avoid eye area.

NOTE: Some people experience a mild tingling sensation after applying C+E Repair P.M.

This feeling indicates that the derma-available vitamin C is penetrating the skin and beginning to confer its unique benefits. Using caution, and being sure to avoid the

eye area, continue to use the product. Most people find that their skin adjusts after just a few days and the tingling sensation disappears. If discomfort continues for longer than a week, discontinue use.

WHAT ARE THE KEY INGREDIENTS IN C+E REPAIR P.M.™?

Ingredients: Dimethicone (and) Polysilicone-11, Cyclomethicone (and) Polysilicone-11, L-Ascorbic Acid (Vitamin C), Tocopheryl Acetate (Vitamin E), Retinyl Palmitate (Vitamin A)

IS THERE CLINICAL PROOF* THAT C+E REPAIR P.M. WORKS?

Enfuselle products have been clinically tested at independent laboratories.

Procedure: Enfuselle C+E Repair P.M. containing 10% pure L-ascorbic acid and 5% vitamin E was evaluated under clinically controlled conditions. 22 women and men between the ages of 30 and 70 used a regimen consisting only of their normal cleanser and C+E Repair P.M. twice a day for a period of 84 days. The product was applied to one-half of the face in a controlled and supervised manner. The other half of the face served as the control.

Results:

- 154% increase in skin resilience and firmness in 4 weeks.
- 199% decrease in the appearance of fine lines of the skin in 4 weeks.
- 49% decrease in the appearance of skin wrinkles in 4 weeks.
- A definitive evening of skin tone in 84 days.

Conclusion: Enfuselle C+E Repair P.M. significantly improves skin elasticity and significantly reduces the visible signs of aging.

*In half-face studies, bioinstruments were used to objectively measure the depth of fine lines and wrinkles on one side of the face where Enfuselle was being applied and compare these results to the control side where no skin care products or makeup were used. The results of the tests, due in part to rapidly changing climate conditions, were extraordinary: where no skin care or cosmetic products were used, the visible signs of aging became measurably deeper, while the skin treated with Enfuselle products steadily improved.

WHY CHOOSE ENFUSELLE C+E REPAIR P.M.?

- Visibly increases the firmness and resilience of skin
- Breakthrough patent-pending formula
- Formulated with 10% vitamin C and 5% vitamin E
- Unique water-free, skin-activated formula
- Won't clog pores
- 100% fragrance and dye free
- 100% oil free
- Allergy tested
- Clinically formulated
- Dermatologist tested
- Not tested on animals
